

## Shelsley Walsh 25 June 2022      Championship rounds 5 and 3

The weather forecast was for showers but the course was in a good dry condition all-be-it with fast moving clouds and blue sky above. We were the second largest class at the meeting, with thirteen cars plus a couple of double drives. For Finley Cameron this was his first drive in the car.

*Finley waits patiently*

Practice went smoothly with very little drama but unfortunately after his second run Tim discovered that the Woodruff key for the on-board starter had failed, damaging the crank, ending his day. Unusually there was a third practice just after a short sharp rain shower. Only four drivers took up the challenge on a now very wet hill!

Over the lunch break, Charles altered the carb jets on his twin and Richard altered his gearing, but that was the extent of tinkering.

Timed runs got underway on a now dry course and it was at this point the gremlins put in an appearance. Steve had his gearbox casing break as he started up and then just after Crossing, and going strongly, Alistair had the exhaust push rod fail, stopping the engine.

As the afternoon drew to a close and our final climb of the day drew near, the clouds began to threaten but luckily it stayed dry and all except Richard shaved more from their times.

*Charles presses on*

The results are amazing in just how close competition has played out this year with six cars covered by less than a second, and bodes well for the rest of the season.

## Results

### Championship round 5

		Run 1	Run 2	Best
Fin Mackintosh	Cooper Mk XI Norton	39.11	<b>38.88</b>	<b>38.88</b>
Max Mackintosh	Cooper Mk VI JAP	39.87	<b>39.82</b>	<b>39.82</b>
